

Waste Management Utility Rates

As stewards of the public trust, one of our core principles is to conduct our operations in an open and transparent manner. When looking at rates, the City considers the following

- Having sufficient financial resources and ability to fund continued operation, maintenance, and construction of high-quality and essential electric, waste collection, water and wastewater services
- Ensuring facilities are run in an economical and equitable manner
- Meeting the demands of its customers without compromising the ability of future generations to meet their own needs

| | |
